

Our Manufacturing Department is in full swing! Need a part? We build them. For quotes on manufactured items, please contact our sales department, send a sample or fax or e-mail drawings and we will contact your company. Magic Industries manufactures hard-to-find parts as well as parts made overseas in the oilfield, construction and plastic industries. Most parts are made in quantities of 50 up to 1,000 or more at a time.

After a month of hard work, the finished bolts are ready for use. The machine can also be used to produce other parts, such as shafts and gears.
